■INACTIVATE

FUNCTION	LAST EXECUTION	INTERNAL NAME	SCHEDULE	STATE
Push cancelled and invalidated tickets		Home match	Mon, 8 Nov 2021 - 5 minutes	Active
Push controlled tickets			Manual	-
Retrieve ticket status from TIXnGO		Home match	Mon, 8 Nov 2021 - Wed, 9 Nov 2022 - 5 minutes	Active
Tickets external printing		Home match	5 minutes	Active

This batch pushes the controlled status of the tickets to TIXnGO

The tickets pushed are all the ones that:

1. Have been injected
2. Have been controlled
3. Comply with the filter (shipment mode)
4. Have not been already pushed by that function for that given interface

### Recommended frequency

Every 5 minutes. Can run every minute during event.

### Recommended batch size

10 000

### Date from

Can be used to force the sending of all controlled tickets as if the last successful execution of the function was at the given date..

Do not use it if you don't understand clearly the usage.

Date from (DD/MM/YY hh:mm)
