Partners Directory

SECUTIX is proud to have many partners integrate in its ecosystem.

SECUTIX's partnership strategy is to forge links either with:

1. Partners providing advanced functionalities related to ticketing (For example : Yield Management, 3D seating plan...)
2. Partners providing an extension of the functionalities available to our customers (For example : management of donation campaigns, loyalty programs, cancellation insurance...)
3. Partners offering solutions that deepen the functionalities of SECUTIX (For example : Data Analytics, CRM, protection against fraud...).

All this is made possible thanks to the technological opening of SECUTIX:

- Which exposes a range of APIs allowing partners to interact with the back end or the front-end of SECUTIX
- Which allows SECUTIX to be connected to third-party solutions. These "plug-ins" connectors can now be developed by the partners themselves.
