

Organisation | Initialisation | Custom variables

Comfort variables must be created in Organization context Initialization Custom variables.

Comfort variables are elements that you can display on the ticket. They are **generally used to display static information** that cannot be configured elsewhere in SECUTIX.

They are linked to the Free_Text fields in the ticket editor. See [Liste des variables dans l'éditeur de maquettes de billets](#)

The screenshot displays the 'Custom Variables' configuration interface. On the left, a sidebar lists navigation options under 'Initialisation' and 'Organisation parameters'. The 'Custom variables' option is selected. The main area, titled '★ Custom Variables', contains a table of variables with columns for 'INTERNAL NAME' and 'CODE'. Above the table are '+NEW' and '-DELETE' buttons.

INTERNAL NAME	CODE
AGESSA Droits de mise en scène	D_8AgsDS
AGESSA Droits principaux	D_5AgsDP
Aide à l'équipement	AUT_AidE
