

Organisation | Goods | Sales

Pre-requisite: Have configured products.

Configuration & complete information [Merchandising / Boutique](#)

Depending on the size of your catalog, it may be useful to mass create store products [Comment créer en masse des produits boutique/merchandising?](#)

Aim: Sell products at the point of sales

Description:

The store is a point of sale associated with a storage location.

Items are entered by scanning the barcode or selecting on a touch screen by family, sub-family, paginated list of items.

It is possible to create mixed "ticketing / derivative products" baskets.

The withdrawal of products is immediate and creates a stock movement from "store X" to "customer delivery".
