

Remplir plus facilement les questionnaires

Pour la vente de billets avec un questionnaire, des cases à cocher permettent aux opérateurs de sélectionner les réponses qui seront alors reprises pour les billets suivants.

Les opérateurs peuvent également sélectionner l'ensemble des réponses en cochant la case «Use all answers as default» en bas de la fenêtre contextuelle.

The screenshot shows a web application for ticket reservations. A modal window titled "Homage To Jacqueline Picasso - Adult -" is open, displaying a questionnaire. The questionnaire has four items, each with a checkbox on the left:

- ☒ Have you visited MOSA before? yes no
- ☒ How much do you usually spend at a museum
- ☐ First name
- ☐ Last name

Below the questionnaire, there is a note: "(Select the answers to copy to next tickets)". At the bottom of the modal, there are three radio buttons: "Sort by tariff" (selected), "Sort by product", and "Use all answers as default" (unchecked). To the right of these are two buttons: "SAVE AND NEXT" (red) and "CLOSE".

Two green arrows point to the checkboxes for "Have you visited MOSA before?" and "Use all answers as default".

The background interface includes a top navigation bar with various icons and labels, a sidebar with "Sales - reservation" and "File 3382", and a main content area with sections for "Contact detail", "Ticket delivery", "Document shipping", and "Contact origin".
