

Mejora de la usabilidad del cuestionario

Cuando se venden entradas con cuestionarios configurados, ahora existen casillas de verificación que permiten que los operadores seleccionen las respuestas que hay que copiar para las entradas siguientes.

Los operadores también pueden seleccionar las respuestas que deben copiarse en las siguientes entradas utilizando la casilla de selección «Usar todas las respuestas por defecto» situada en la parte inferior de la ventana emergente.

The screenshot displays a software interface for managing reservations. A modal window titled "Homage To Jacqueline Picasso - Adult" is open, showing a questionnaire. The questionnaire includes the following questions and options:

- ☒ Have you visited MOSA before? * ☐ yes ☐ no
- ☒ How much do you usually spend at a museum
- ☐ First name
- ☐ Last name

Below the questions, it says "(Select the answers to copy to next tickets)". At the bottom of the modal, there are three radio buttons: "Sort by tariff" (selected), "Sort by product", and "Use all answers as default" (indicated by a green arrow). There are also "SAVE AND NEXT" and "CLOSE" buttons.

The background interface shows a "Sales - reservation" section with a "CONTACT" tab. It includes fields for "Contact search", "Mode" (set to "Immediate"), "Contact", "Address", "Email", and "Immediate printing" (set to "yes"). There is also a "Document shipping" section with "ADD" and "RESET" buttons, and a table with columns "DOCUMENT NAME", "QTY", "SHIPMENT", and "ACTL...".
