Institution | Initialisation | List of values

Pre-requisite: This screen lists a lot of values that you can see in SecuTix and can be changed from this screen (example Match / Round name).

Specifics needs: When a value cannot be changed / added, you need to open a service to ask for a change in these lists.

- Masked values should not be unmasked and used without asking SecuTix.
- · In the column "Description" below, technical means there is usually no business reason to modify the list of values.
- When you add a new value, you need to comply with the code format pre-existing for the values. For example, if you add a new Match day, the
 code should start with MATCH_DAY followed by the value (example: MATCH_DAY/M1)

Entity	Attribute	Description	Applies to
AdministrativeNumber	Туре	Fields for administrative numbers - technical	Administrative numbers
Advantage	Target Type	Types of advantages - technical	Advantages
ComfortVariable /TicketTemplate	TicketModelCode	Number of free/custom fields available in the ticket template editor	Ticket template
CommunicationMean	Telephone Operator	Contact phone operator	Contact
