

Institution | Tools | Paper Formats

Pre-requisite: have a printer (ticket, A4, card)

Description: For printing, you need to define printer models and printing type that you will use. For example, if you will print RFID badges, you need to determine which printer will be used for this.

Specific configuration includes:

- Ticket Support:
 - Thermal ticket => thermal printers
 - RFID printed => RFID printers
 - Simple card => badge (non RFID)
- Number of parts => if the ticket has a removable part
- On tax stock => legal information to define whether tickets printed with this printer should be counted in local tax legislation.
- Compatible printer models => typically one printer per paper format, unless two variants of the same printer are used (such as BOCA 275 + BOCA 290)
- Ticket size shall be the same as the size configured in Ticket Templates

The screenshot displays the 'Paper Formats' configuration interface. On the left, a table lists existing formats. On the right, the 'Edit Ticket Size' form for the 'BOCA' format is shown.

Table: Paper Formats

INTERNAL NAME	CODE	TICKET SUPPORT	WXH[MM]	NO OF PARTS
BOCA	BOCA	Thermal ticket	203x82	2
RFID Badge	RFID	RFID printed	86x54	1

Form: Paper Format > BOCA

Internal name * EN BOCA
FR
DE BOCA
JA

Code * BOCA

Ticket support * Thermal ticket

Width * 203 [mm]

Height * 82 [mm]

Number of parts * 2

On tax stock * ☐ yes ☒ no
