

How to import single usage codes

- one code per line
- each code must be less than 20 chars
- only numbers and alphabetic are accepted
- Case is ignored
- **A maximum of 1000 codes can be imported at a time**

If the length of imported codes is not 16 chars, in order to use it at fastlane, make sure you have configured this parameter: "config.voucherCode.validateRule = FREE_MODE" at the B2C point of sales advanced internet theme:

Then, in the standard generation screen (Sales , you now have an "import codes from file" option.:
