

Welcome to S-360 Screen Help

This space is a work in progress.

On a large portion of the S-360 backoffice screens you will now find a question mark that will redirect you to contextual help providing information about each field on the screen. The contextual help content is under development and will continue to be enriched over time.

These pages will be available directly from the screens of the backend:

They will appear starting in Allalin V1.8, **if you're logged in english**. As the translations become available, we will open them to the other languages of the backend.

S-360 Screen Help is here and you will love it and benefit from this contextual help. when a question mark is displayed on a page you can access an extensive screen help page on fields and buttons available on the corresponding screen.

- **Sub-Heading** - Describe for who the feature is and what benefit the customer get from it. (One sentence only underneath the title.)
- **Summary** - Give a summary of the product and the benefit. Assume the reader will not read anything else so make this paragraph good.
- **Problem** - Describe the problem your product solves. (One sentence)
- **Solution** - Describe how your product elegantly solves the problem. (One sentence)
- **How to Get Started** - Describe how easy it is to get started or point to a **How to** page that can get access from the tutorial section.
- **Other Call to Action (optional)** - Give pointers where the reader should go next or if there are other feature related to the one you have described.
