

How to change the button labels/text links in the tickeshop?

The standard terminologies on SecuTix online store do not always match the message you want to convey?

It does not stand, you have the power to change it!

SecuTix incorporates an advanced customization feature for online sales labels.

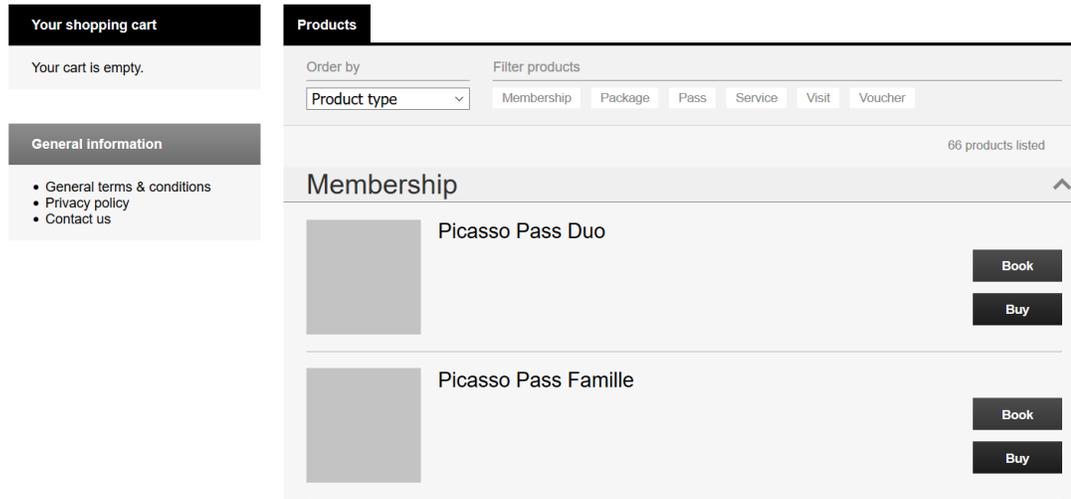

Warning: the same label can be present at multiple locations in the online store. Proceed with caution when deciding to modify them.

Case study:

- Replace Buy by Order

1) Identify the label keys

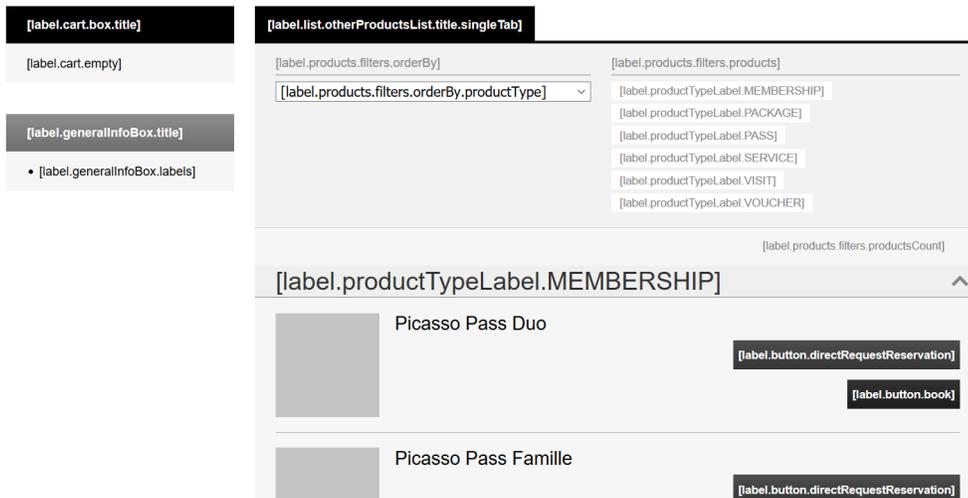

In **pre-production**, on the online store, locate the elements to be modified.

Staying on the same page, add at the end of the URL **?lang=dev** or **&lang=dev** (if the URL already contains a "?")
Here, the URL <https://secutix.pp-shop.secutix.com/list/events> becomes <https://secutix.pp-shop.secutix.com/list/events?lang=dev>

or else <https://secutix.pp-shop.com/selection/pass?productId=101350364664&lang=dev>

The label keys are now visible. You just have to copy the ones you are interested in.

In this case **label.button.book** .

Reminder: the same label can be used in many different places on the different pages of the online store. We recommend you to be extremely careful when making your changes.

2) Modify the labels

In the back-office ([production](#)), go to Organism -> Sales channels and select the concerned internet channel, and open the point of sale on which you wish to make the modification.

If you want to make the modification on several points of sale, you will have to repeat this operation for each point of sale.

The screenshot shows the back-office interface. On the left, there is a sidebar with 'Your shopping cart' (empty) and 'General information' (links to terms, privacy, contact). The main area is titled 'Products' and shows a filter for 'Product type' with 'Membership' selected. Below, two products are listed: 'Picasso Pass Duo' and 'Picasso Pass Famille', each with 'Book' and 'Order' buttons.

Once in the point of sale, click on **Internet theme**, and go to the **Advanced** tab

The screenshot shows the 'Internet theme' configuration page in the 'Advanced' tab. It features a table for overriding text labels with columns for KEY, ES, EN, DE, FR, EU, CA, and PT. The table contains two rows: 'config.voucherCode.validateRule' and 'visu.seat.resume'. The 'visu.seat.resume' row has 'TEST ES' and 'TEST EN' in the ES and EN columns respectively.

In **New**, paste the label key to be modified, then enter the replacement text (and its possible translation - reminder: without translation, the text will be the same in all available languages).

Point of sale theme custom labels

Content

Key *

Translations

ES	<input type="text" value="Pedir"/>
EN	<input type="text" value="Order"/>
DE	<input type="text"/>
FR	<input type="text" value="Commander"/>
EU	<input type="text"/>

More languages

Expand all Collapse all

Note: html tags are supported by the Ticketshop screens. For instance, you can insert clickable links or put your texts in italics.

Save and close.

You should now see the modified labels in the list in front of you.

Internet theme

General structure Content Mobile Custom **Advanced** View ticketshop | Reset theme

This screen lets you override text labels. It should only be used by advanced users as it can corrupt online sales if used incorrectly.

When doing the bulk import, all pre-existing labels will be overridden.

To change a label you need its key. To find a key, open the webpage where the label appears and add `?lang=dev` to the URL (in any test environment – not in production).

[+ NEW](#) [- DELETE](#) [EXPORT TO EXCEL](#) [IMPORT EXCEL](#)

KEY	ES	EN	DE	FR	E
config voucherCode validateRule	FREE_MODE	FREE_MODE	FREE_MODE	FREE_MODE	
visu.seat.resume	Pedir	Order		Commander	

Number of items: 2

At this stage, it may be necessary to suspend and then reactivate the point of sale to force the synchronization of the elements.

☆ **Sales Channel > Internet - Test**

Internal name State Status

	INTERNAL NAME	CODE	NO	WORKSTATION	STATE	STATUS
<input type="checkbox"/>	TicketShop	TS	1		Running	Visible

3) See the changes

Go back to the online store: your labels have been well modified.

The screenshot displays a web interface for an online store. On the left, there is a sidebar with two sections: 'Your shopping cart' (with the message 'Your cart is empty.') and 'General information' (with links for 'General terms & conditions', 'Privacy policy', and 'Contact us'). The main content area is titled 'Products' and features a filter section with 'Order by' and 'Filter products' options. The 'Filter products' section includes a dropdown menu for 'Product type' and several filter buttons: 'Membership', 'Package', 'Pass', 'Service', 'Visit', and 'Voucher'. Below the filters, it indicates '66 products listed'. The main product list is titled 'Membership' and shows two items: 'Picasso Pass Duo' and 'Picasso Pass Famille'. Each item has a placeholder image and two buttons: 'Book' and 'Order'.

Complementary information:

- Any label can be modified.
- If you have already requested a complex customization of your online store, it is possible that you are not able to modify certain labels via this process. Feel free to contact us for assistance.
- If you use widgets, it is possible that some specific labels exist in case of widget. Therefore, it is advised that you change the widget to lang=dev to verify the correct label.
